

44 of 45 businesses had no website

What we found researching West African businesses that sell on TikTok.

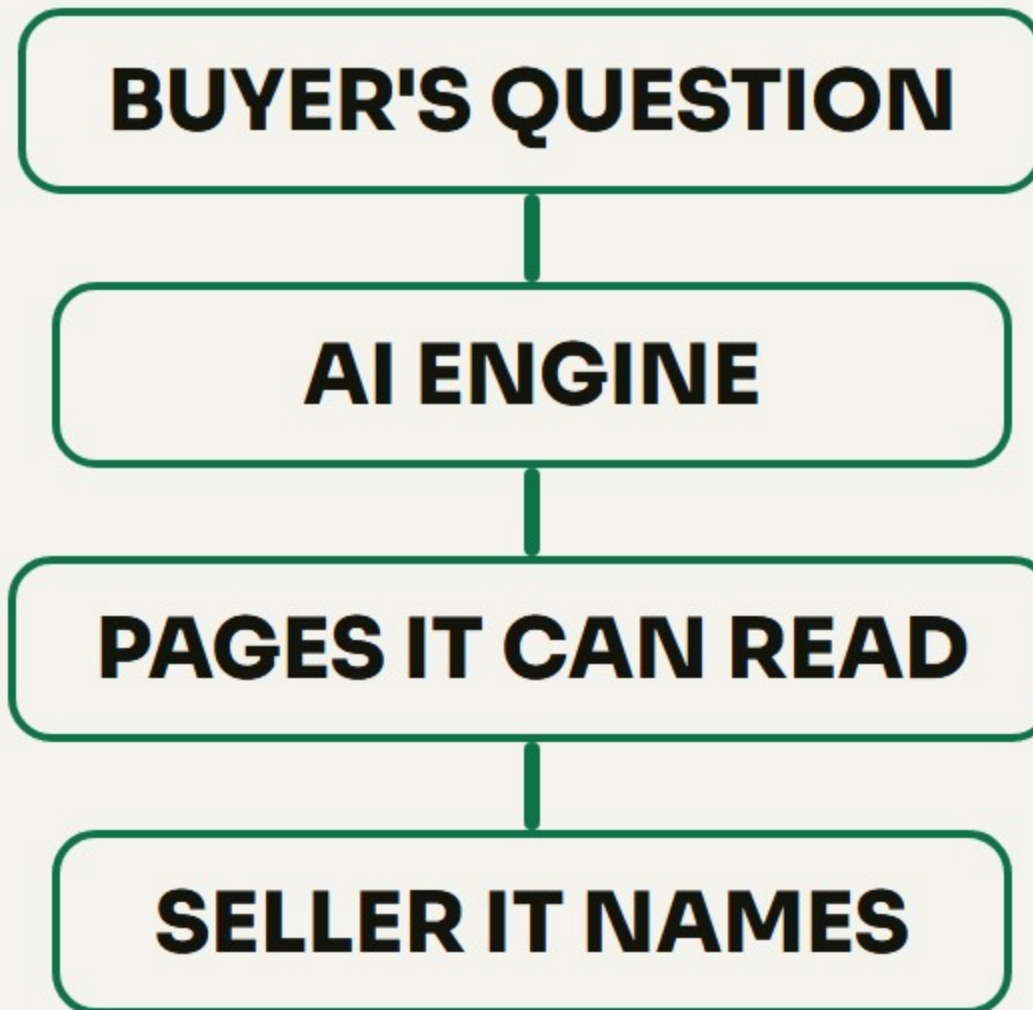

The storefront is a caption

Real estate, agencies, shops — selling through TikTok captions and hand-typed WhatsApp replies.

It works until the buyer asks **AI**

An AI assistant answers from pages it can read and trust. A caption buried in a feed isn't one of them.

How **AI** finds a seller

Caption vs **one-page** site

CAPTION ONLY

- × No page AI can read
- × Details buried in text
- × Gone when the post sinks

ONE-PAGE SITE

- ✓ Services, prices, location
- ✓ One routed contact
- ✓ Readable by search and AI

Two or three **numbers** in one caption

A pattern we saw again and again. Every unrouted number is a call that can ring out.

**A one-page site is
step zero of AI
visibility**

Save this for your one-page site

Share it with someone who sells on TikTok.
