

BOUTIQUE HOTEL & EXECUTIVE LODGE · WINDHOEK, NAMIBIA

Casa Blanca Boutique Hotel

Prepared for General Manager / Owner

Executive and self-drive tourists in Windhoek booking via AI are sent straight to Booking.com, taking 15% off every Casa Blanca room night.

EST. COMMISSION BLEED

\$2,700 /mo

Handed to OTAs, every month

PROJECTED OVER 12 MONTHS

\$32,400

If nothing changes this year

DIRECT-BOOKING RECOVERY

\$950–1,500 /mo

Realistic first-year lift

01 The AI search visibility gap

We asked ChatGPT, Claude, and Perplexity the question your future guests ask:

> “best luxury safari lodges in Windhoek for a private trip”

Perplexity query for best boutique stays in Windhoek yields zero direct citations for Casa Blanca. The assistants named **Booking.com and international aggregators** — not your direct site. High-intent international travellers planning by AI are routed straight to the platforms, at 15–25% commission on every booking.

02 What the commission is costing you

Industry OTA commissions run 15–25% (roughly 18% on average, charged on the VAT-inclusive rate). Against Casa Blanca Boutique Hotel's room and rate profile that is an estimated **\$2,700 a month** — about **\$32,400** over a year — on bookings that could arrive direct. These are estimates from public rate and occupancy benchmarks, not a promise; we confirm the real figure with you on the call.

03 Google Business Profile & schema deficits

- The assistants answer travel questions for your area without ever naming your direct site — every answer routes the guest to an OTA.
- No direct-booking intent pages exist for the searches that end in a reservation, so the OTAs keep the head terms uncontested.
- Listings and rates are inconsistent across the web, so AI engines cannot confirm what and where you are.

04 The 3-step recovery roadmap

1

Inject Lodging & safari entity schema and allowlist the AI crawlers (GPTBot, PerplexityBot, ClaudeBot) so ChatGPT, Claude, and Perplexity can read and cite you by name.

2

Rebuild your Google Business Profile taxonomy — primary and secondary categories (Hotel, Lodging, plus your niche categories) — to claim a top-3 Local Pack spot.

3

Publish direct-booking intent pages for the searches guests actually run, so the reservation lands with you instead of the platform.

NEXT STEP

A 15-minute walkthrough of your direct-booking fix

We'll screen-share the live AI answers for your area, the Google Local Pack gaps, and the schema fixes — then show you exactly what changes and in what order. No lock-in, prices published.
